SUMMARY

I am a proactive, results driven, ambitious, action oriented, industrious team player with strong interpersonal, analytical and communications skills; who loves tackling problems head on; and can work equally well autonomously. I have a sound understanding of software development life cycle (SDLC), app and web development, and relentless customer focus. I am proficient in all aspects of the SDLC including requirement analysis, design, development and production support. I have intermediate knowledge of Data Warehouse and Business Intelligence (BI).

Having completed an under-grad in IT, followed by a post-grad in IT and Business Information Systems (Monash University, 2014-16); I moved to Sydney in 2016. At present I work with Newton's Nerds; a software development company, who specialises in desktop apps (C#, .NET), intranets (SharePoint), website development (WordPress, Joomla, Magento, OpenCart), search optimisation and native apps for iOS & Android; tailored for small-medium businesses. We work in a fast-paced, lean and agile environment; and pride our client service.

Curious and inquisitive by nature, I am fascinated by technology, and the role it plays in our lives. I love what I do, and it drives me to excel. I am very interested in Big Data, data science and business analytics, and am a huge supporter of evidence based data-driven decision making.

EXPERIENCE

Full Stack Developer (Aug 2016 - current)
Newton's IT
Roles and responsibilities include
